23CSE202 DATABASE MANAGEMENT SYSTEMS
S3 B.Tech CSE
Department of Computer Science and Engineering
Amrita School of Computing, Amritapuri Campus

2. UI Design Document

Group No : D 11
Team Members :

Roll No	Student Name
AM.SC.U4CSE25323	ISHAAN S VANNERI
AM.SC.U4CSE25330	MADHAV S THAMPY
AM.SC.U4CSE25338	NIHARIKA S H

Project Title : E-Commerce Platform

2.1. Functional requirements:

1. • **User Registration and Authentication** – Users can create an account, log in securely, and manage their profiles.
2. • **Product Browsing and Search** – Users can browse products by category, search for specific items, and view detailed product information.
3. • **Shopping Cart Management** – Users can add, update, or remove products from the shopping cart before checkout.
4. • **Order Placement and Order History** – Users can place orders, view previous orders, and track order details.
5. • **Admin Dashboard** – Administrators can add, update, delete, and manage products, categories, inventory, and customer orders.
6. • **Inventory Management** – The system automatically updates product stock after each successful purchase and maintains inventory records.
7. • **Database Management** – The system securely stores and manages user, product, category, and order data using a relational database with proper relationships and constraints.

2.2. Non functional requirements:

1 • User-friendly and Responsive Interface

2 • High Performance and Fast Response Time

3 • Secure User Authentication and Data Protection

4 • Reliable and Consistent Database Operations

5 • Scalable System Architecture

6 • Easy Maintenance and Future Enhancement

2.3. List of AI tools used for building UI(if any):

1.ChatGPT (OpenAI)- UI design suggestions and layout improvements

2. Claude – Assistance with UI design and code improvements.

3.

2.4. Prompt (if any) :

Sl. No	Name of the tool	prompts
1	ChatGPT (OpenAI)	Suggest a modern, premium-looking UI design for a luxury watch e-commerce website named HELIOS Watch Store.
2	Claude	Help improve the website layout, styling, and user interface of the HELIOS Watch Store.
3	Mermaid	Create an ER diagram representing the entities, attributes, relationships, and cardinalities of the HELIOS Watch Store database.

2.5. List of files:

HTML files: base.html, index.html, products.html, product-details.html, login.html, signup.html, cart.html, favourites.html, checkout.html, orders.html

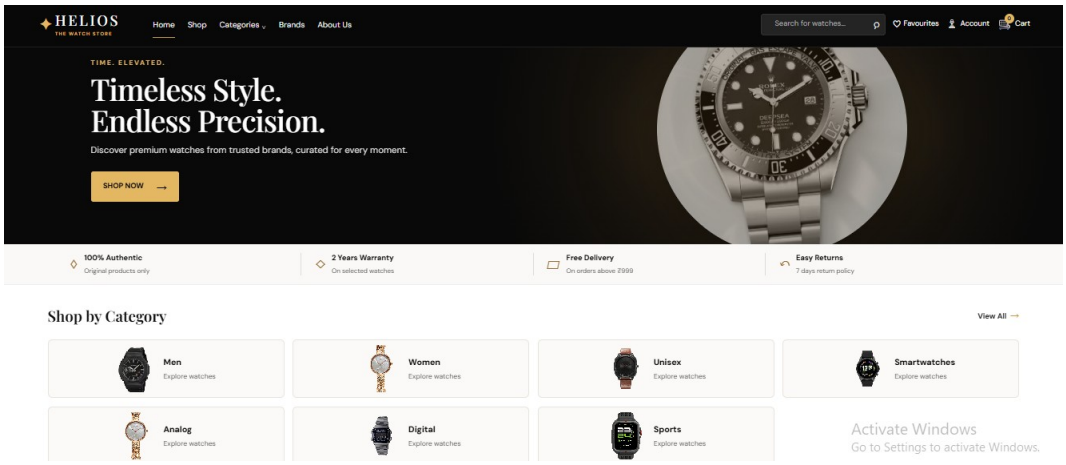

CSS file: style.css

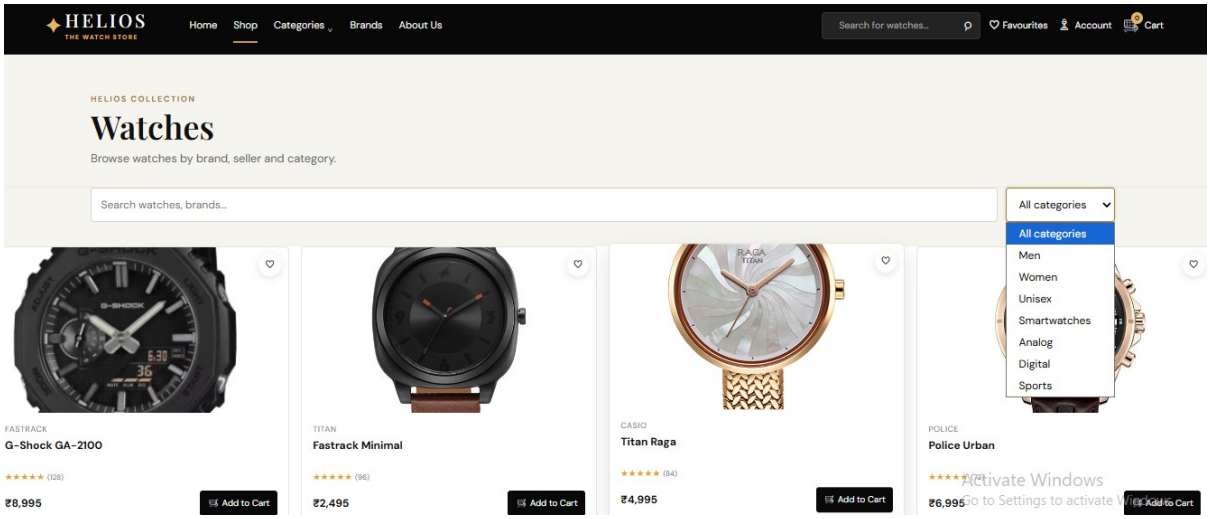

JavaScript files: app.js, auth.js, cart.js, checkout.js, favourites.js, orders.js, product-details.js, products-page.js, products.js

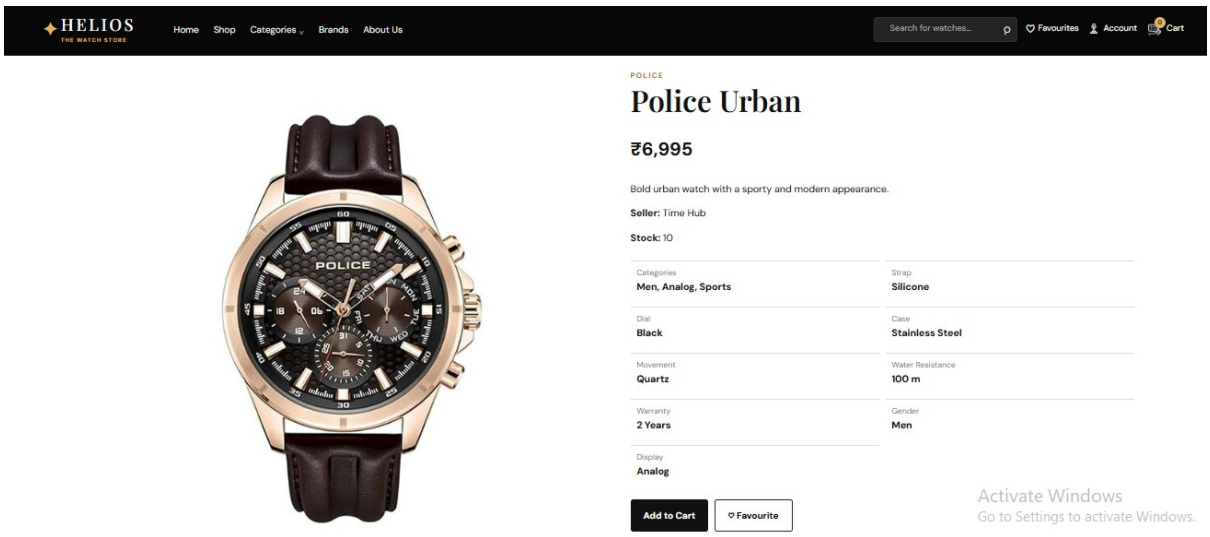

Python file: app.py

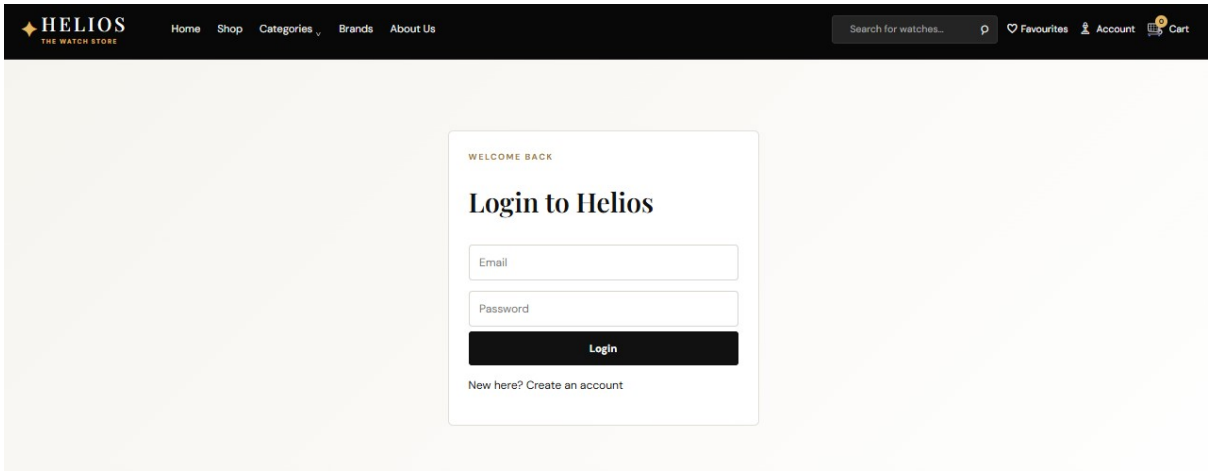

Image files: Product and watch images stored in the static/images/ directory.

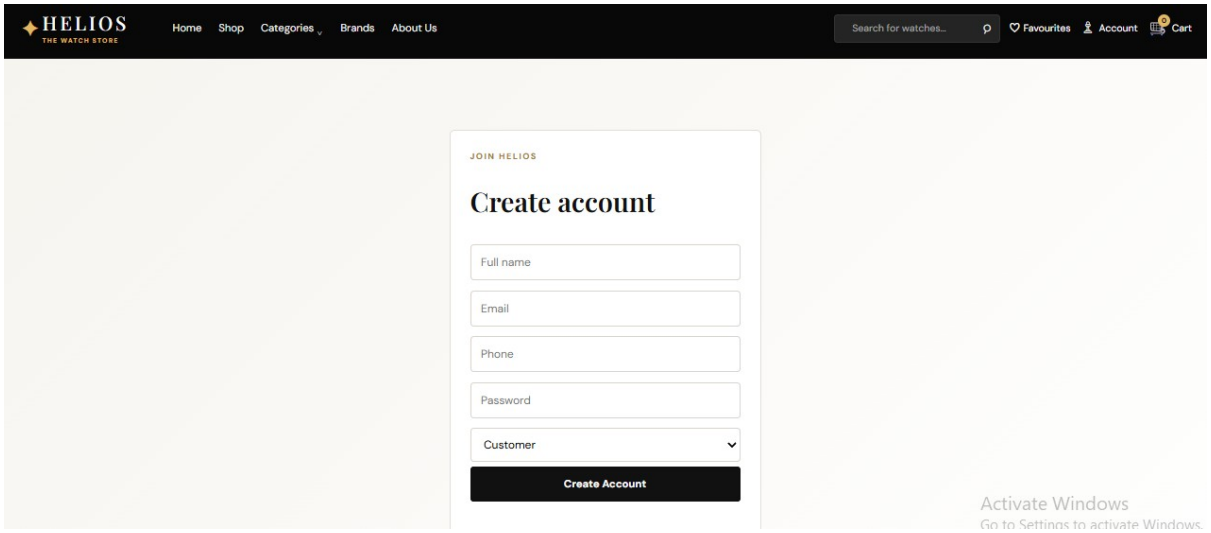

2.6. UI Screenshot:
